Election/Restriction Requirement

Applicant affirms the election of the method claims 1-6, which the examiner searched. The reason for the requirement, as stated by the examiner, was that the apparatus as claimed could be used to practice another and materially different process such as laminating a pair of metallic foils onto opposing surfaces of a prepreg or laminating decorative paper layers onto fiberboard. That breadth of use has been narrowed in this amendment and the examiner's statements would not be pertinent to the claims as presented following. Applicant notes that the examiner's search found devices, and was not limited or directed to methods, and the claims as now presented, are directed more narrowly such that there should be no restriction requirement.
